1.340 mm/year

Humidity

73%

Number of trees

10.782

Process

Natural

Cup Profile

Fragrance and aroma: Jamaica flower, lavender, vanilla, spicy, tamarind, white chocolate. Taste and aftertaste: Citronella, blueberries, pineapple, nutmeg, aromatic herbs, pronounced sweetnes, malic and citrus acidity, silky body, a long finish on the palate.

Fermentation

Manual and rigorous picking. The picking is done in the harvesting peaks to guarantee the amount required to obtain a good batch of natural coffee. The coffee is collected in the indicated maturation.

Drying

After the picking, the coffee is left 48 hours in the silo and then is moved to solar drying for 28 days. Coffee is left in storage for 3 months to help stabilize it and reduce the astringency of freshness.
